NHS Tayside signs five-year agreement to deploy Miya Observations

- Signed agreement with NHS Tayside (Scotland) to implement the Miya Observations and Assessments modules of Miya Precision
- Total Contract Value (TCV) of \$1.9M over five years
- Expands UK market presence to 39 sites (27%), with at least one Alcidion product
- NHS Tayside is now the third health board in Scotland to implement Miya Observations and Assessments for electronic monitoring, continuing to validate the benefits of our products

Melbourne, Victoria – Alcidion Group Limited (ASX:ALC) today advises that it has signed a five-year agreement with NHS Tayside to implement Miya Observations and Assessments (Miya Observations), an electronic monitoring system that will help thousands of busy healthcare professionals as they care for patients.

The contract follows the successful delivery of Miya Observations at NHS Lanarkshire and NHS Fife (both health boards in Scotland) where alerts provided by the system and improved visibility of the sickest patients, have helped staff to significantly enhance patient safety and cut cardiac arrests.

Miya Observations provides an early warning system that shares critical information as soon as it is recorded, rather than passively capturing a patient's vital signs on a paper-based bedside chart. The system then alerts clinical staff when patients show signs of deterioration, allowing healthcare professionals to focus on those patients immediately in need. It has helped hospitals to prevent negative clinical outcomes and to manage risks around deadly conditions including acute kidney injury and sepsis. Hospitals using the system have observed reduced length of stay and many other benefits.

NHS Tayside, which employs 14,000 people and serves a population of more than 400,000, will deploy Miya Observations throughout its regional network.

Alcidion Group Managing Director Kate Quirke noted: "Healthcare technology should exist to provide benefits to the people delivering and receiving care. It should help to make the right thing to do, the easiest thing to do. I look forward to seeing these benefits extend to healthcare professionals and patients in NHS Tayside as the health board deploys Alcidion's capabilities. It is rewarding to see this success story continue to grow in Scotland and to be welcoming another important customer in the UK."

About Alcidion

Alcidion Group Limited (Alcidion) has a simple purpose, that is, to transform healthcare with proactive, smart, intuitive technology solutions that improve the efficiency and quality of patient care in healthcare organisations, worldwide.

Alcidion offers a complementary set of software products and technical services that create a unique offering in the global healthcare market. Based on the flagship product, Miya Precision, the solutions aggregate meaningful information to centralised dashboards, support interoperability, facilitate communication and task management in clinical and operational settings and deliver Clinical Decision Support at the point of care; all in support of Alcidion's mission to improve patient outcomes.

Since listing on the ASX in 2011, Alcidion has acquired multiple healthcare IT companies and expanded its foothold in the UK, Australia, and New Zealand to now service over 300 hospitals and 60 healthcare organisations, with further geographical expansion planned.

With over 20 years of healthcare experience, Alcidion brings together the very best in technology and market knowledge to deliver solutions that make healthcare better for everyone.
